Update to Approval Request

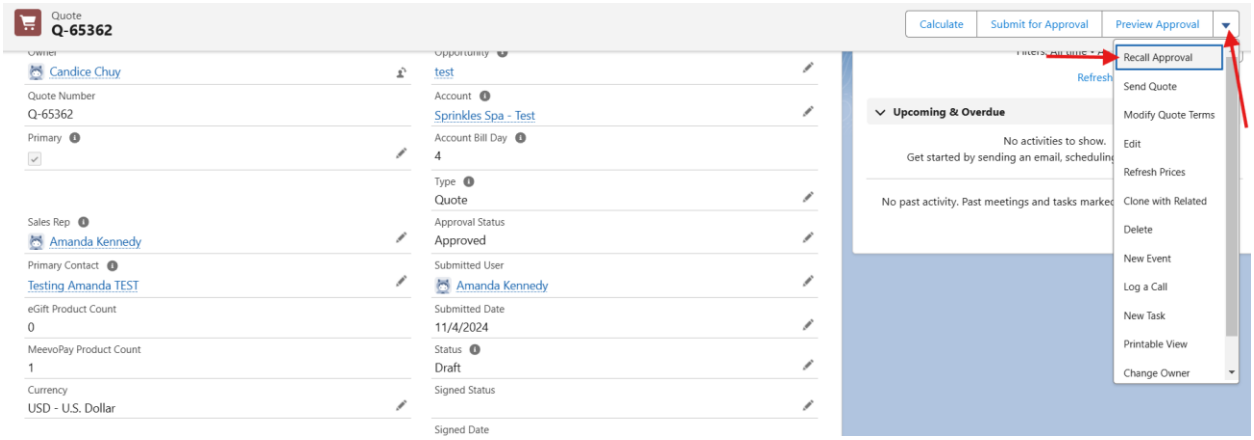

Before a quote is approved, the “Edit Lines” button is available for users to adjust their quote.

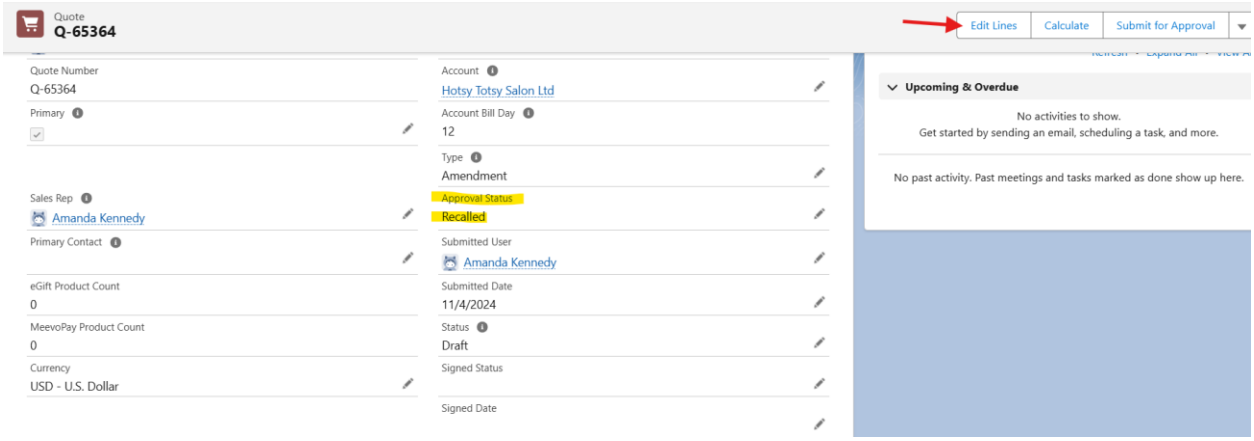

Once a quote is *approved*, users will no longer be able to edit it. The “Edit Lines” button will no longer appear on the Quote page.

To edit a quote that has been approved, users will need to **recall** their approval.

After the quote is recalled, the “Edit Lines” button will appear again.

Be aware, when a quote is recalled, all previous approval history will be wiped. After the quote is sent for approval again, it will be replaced with the new approval request.
